Please find below and/or attached an Office communication concerning this application or proceeding.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Disposition of Claims					
 4) Claim(s) 1-15 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-15 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. 					
Application Papers					
9) The specification is objected to by the Examiner.					
10) ☐ The drawing(s) filed on is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.

Application/Control Number: 10/691,276

Art Unit: 1731

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over CRAIG (2,599,093).

CRAIG teaches producing pulp in the production of a fiber web, e.g. paper (column 2, lines 16-23), by loading the pulp fiber, e.g. bleached and refined sulfite or sulfate pulp (column 2, lines 24-35) with calcium carbonate by way of a chemical precipitation (column 2, lines 48-57); and drying the pulp into rolls or laps (bales) for storage and shipment (column 4, lines 62-68). See column 4, lines 50-56 for drying to a moisture content of 5-10% (dry content of 90-95%). If necessary it is obvious the fiber of CRAIG can be a pulp as column 2, lines 24-35 teaches that the fibers include papermaking pulps. Claim 12 is rejected, as chemical pulping is a cooking operation.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over CRAIG (2,599,093) as applied to claim 3 above, and further in view of DRUMMOND (6,602,385) or PITKANEN et al (6,436,238).

CRAIG teaches that the pulp may be bleached (column 2, line 29). PITKANEN teaches making filled pulp from peroxide bleached mechanical pulp (column 4, lines 26-38 and column 6, lines 10-19). It would have been obvious to use peroxide to bleach the pulp of CRAIG prior to adding the calcium carbonate as such is taught by PITKANEN et al. Or DRUMMOND teaches peroxide bleaching (column 2, lines 59-67) pulp filled with

Application/Control Number: 10/691,276

Art Unit: 1731

calcium carbonate. It would have been obvious to brighten the calcium carbonate filled pulp of CRAIG by bleaching with peroxide in the manner taught by DRUMMOND.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve Alvo whose telephone number is 571-272-1185.

The examiner can normally be reached on 6:00 AM to 2:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
